

Lessons Learned

- Include testcases with exercises
- Bring a laptop
- Encourage crowd-sourcing of extra content
 - E.g. someone read Real World Haskell
- Make everyone GitHub collaborators
- Cancel Meetup “Organiser Dues” immediately

Include testcases with exercises so people can quickly verify their answers.

Bring a laptop

- CL can display their notes as they talk through them
- Can hack Haskell

Encourage crowd-sourcing of extra content

- Get everyone to research the topic (not just leaders)
- E.g. someone read Real World Haskell

Make everyone GitHub collaborators

- So they can write directly to the repo using their own github account.

Cancel Meetup organiser dues immediately

- To avoid getting hit up for \$72 after 6 months

Summary

Haskell is Cool

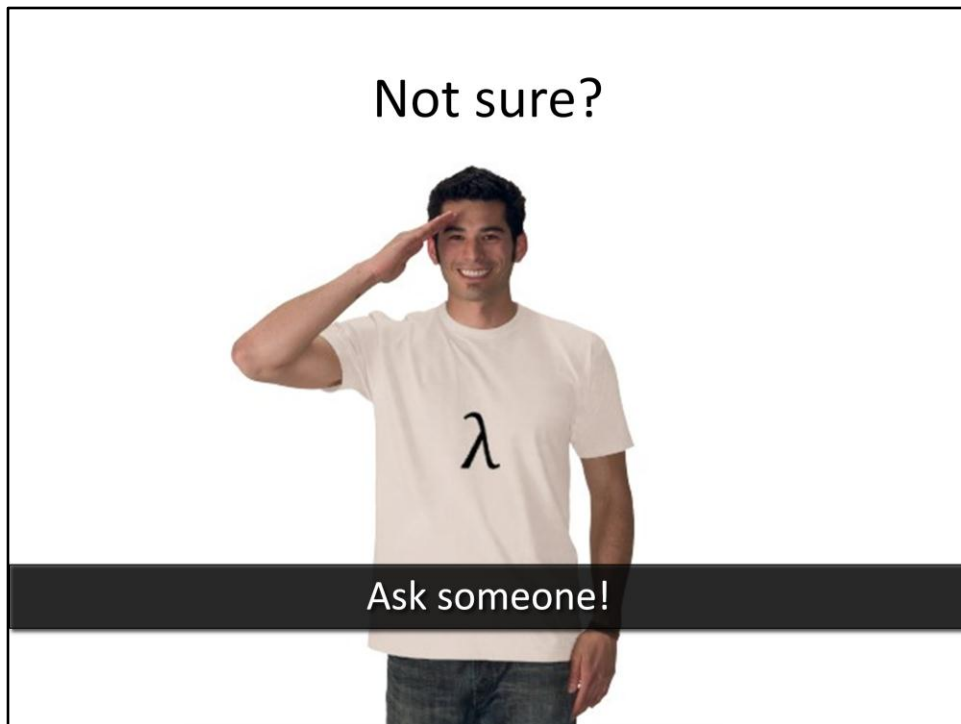

Learn it!

Groups are Great

Start one!

Ask anyone wearing one of these fashionable lambda shirts about it.
Happy to help kickstart your group and connect wannabe Haskellers together.
